The CyberSat events are dedicated to fostering the necessary discussions to flesh out and develop solutions to cyber threats in the satellite industry. Serving two sides of the same conversation, CyberSatCom will take place in the spring in Los Angeles, CA and tackle cybersecurity threats to small satellites and emerging technologies, while CyberSatGov will take place in the fall in Reston, VA and serve the government and military markets.
CyberSatGov is the only satellite security event in the world that successfully fuses satellite, space, cyber, and government to educate on threat vectors and deliver solutions to thwart next generation attacks. CyberSatGov welcomes industry experts, satellite service providers, C-Suite executives, innovators and engineers, cybersecurity experts, Federal Intelligence Agencies, and the DoD for three interactive days of discussions, workshops, and disruptive technologies.
